

We believe our ProMace to be the
**safest, most efficient, accurate
and repeatable Mace Snag Tester**
available anywhere in the World

**We are
confident you
will agree**

ProMace / ProView

MACE SNAG TESTER & ASSESSMENT CABINET

ProMace is designed to rapidly determine the snagging resistance of robust apparel and furnishings fabrics. Compliant with ASTM D3939 (Mace), JIS L 1058 and VDA 230-220 standards.

KEY BENEFITS

REPEATABILITY & ACCURACY

Our aim when designing ProMace was to significantly improve upon the repeatability and accuracy of the mace snag testers available in the market.

VDA COMPLIANT

When used with IMAT-UVE mace balls the ProMace is compliant with VDA, Verband der Automobilindustrie e. V., the German Automotive Industry Association.

MACE BALL HOLDERS

The mace balls are stored in non-contact holders designed to remove the risk of pin damage.

REDUCED RISK IN PIN DAMAGE

The unique design of the cylinder length offers a significant reduction in the threat of the pin points breaking.

REMOVABLE CYLINDERS

The sample holder cylinders are removable. This makes the fitting and drying of the felt sleeves and the sample mounting very easy.

INTUITIVE TO AID CONFORMANCE

The UniController enables the user to control all aspects of the test in a simple and intuitive manner to minimise training time. Time periods can be set for the inspection of Points, and the change of Points and the Felt Sleeves.

2 x 2 ROLLER CONFIGURATION

The vertical 2 x 2 configuration of our mace snag tester has a footprint 50% smaller in comparison with other mace snag testers.

REMOVABLE DEBRIS TRAY

Removable sliding trays collect the debris from the test for easy cleaning.

SAFETY GUARD

A hinged interlocked safety guard fully encloses the instrument - the testing is performed with complete safety.

MACE INSPECTION HOLDER

A mace ball inspection holder is designed for the user to hold the mace ball safely and securely whilst inspecting and changing the points.

PROVIEW ASSESSMENT CABINET

The grading process easy and efficient with access, via a 'swipe' of the integrated 7" touchscreen, to pre-programmed photographic assessment images.

EMPA IMAGES

Under an exclusive license agreement with Swisstatest, EMPA Pilling Standards are amongst those pre-loaded onto ProView.
