

COTTON LAWN (CROCKING CLOTH) FOR COLOUR FASTNESS TO RUBBING TESTS

COTTON LAWN

Cotton Lawn, which is also known as Crocking Cloth and Cotton Rubbing Cloth, is used for dry and wet colour fastness to rubbing tests specified in ISO 105-X12 and in AATCC Test Method 8.

The manufacturing specifications for the cloths used for ISO and AATCC test methods are different and, as they give different results, they should not be mixed.

We manufacture both ISO and AATCC cloths strictly in accordance with the specifications and evidence of compliance is available as free of charge Certificates of Conformity.
